WORK EXPERIENCE

Integration Specialist   Feb 2023 – Present
Podium   *Lehi, UT*

- Collaborated with clients and cross functional teams to identify business requirements and design custom integrations between client systems and Podium applications.
- Built and tested integrations using a variety of tools and technologies, including APIs, AWS services, Postman, custom FTP servers, and third-party automation platforms.
- Developed comprehensive technical documentation, including API specifications, integration workflows, and troubleshooting guides, facilitating streamlined onboarding for new team members and clients.
- Conducted comprehensive performance testing and optimization for integrations, utilizing monitoring solutions and tools. Ensured consistent high availability and exceptional responsiveness.
- Proficiently conveyed complex integration processes to non-technical clients in a clear and accessible manner, using plain language and visual aids to ensure their understanding and confidence in the integration project's success.

Freelance Web Developer   June 2022 – Feb 2023

- Developed responsive and user-friendly websites using JavaScript, React, HTML, and CSS, ensuring seamless functionality across various devices and browsers.
- Translated client requirements into fully functional and visually appealing websites, customizing designs to match their branding and user experience preferences.
- Provide clients with training on website management and offer ongoing support for maintenance and updates.

EDUCATION

Bachelors of Science in Computer Science   2019 - 2022
Oregon State University   *Corvallis, OR*

PROJECTS

Senior Capstone Project - E-commerce Website   Sep 2021 - June 2022

- Collaborated in a cross-functional team of three to overhaul and enhance the functionality of an e-commerce website for an automotive business, focusing on improving the user experience and driving online sales.
- Implemented an Agile methodology with sprint cycles to efficiently prioritize tasks, meet project milestones, and ensure alignment with the client's evolving requirements, resulting in a streamlined development process.
- Maintained detailed project documentation, including user stories, sprint plans, and technical specifications, facilitating clear communication, tracking progress, and providing a valuable reference for project stakeholders and future enhancements.

Word Wise   github.com/vtbell21/wordwise   June 2023

- Created and deployed Word Wise, an engaging online word game using the Django framework. Users enhance their vocabulary by composing accurate, meaningful sentences from randomly assigned words.
- Leveraged the power of the Chat GPT API to analyze and validate user-submitted sentences for grammar, vocabulary usage, and sentence structure, providing real-time feedback to improve language proficiency. Implemented user profiles and leaderboard functionality, fostering competition and community engagement.
